

# Project Zelula - SCRUM plan #3

Group 5/E:

Felix Akkermans

Niels Doekemeijer

Thomas van Helden

Albert ten Napel

Jan Pieter Waagmeester

May 21, 2012

## 1 Introduction

In this SCRUM plan we define the tasks we want to complete in this sprint. Every task is assigned to one or two developers and an estimate is provided for the effort required.

For each SCRUM run a milestone is created at GitHub, with issues for the tasks selected. The issues for this milestone can be found on: <https://github.com/FelixAkk/synthbio/issues?milestone=10>.

## 2 Selection and assignment of tasks

This is the third sprint of our project. During this sprint we will implement validation, evaluation and simulation of a circuit. We will also look at saving and loading a circuit. If all goes according to plan we can start reusing previously build circuits and simulate the outcome of a circuit. If we do this it means we have the product we planned implementing at the beginning of this project. Afterwards it will only be fine tuning.

### Available time

The time available is four mornings in two weeks by five people. That's about sixteen hours per person. Including meetings we come to an estimate of 70 hours of actual working. However, this is below the amount of hours spend with respect to ECTS, so we will plan spend a little more.

A list of tasks, assignments and effort estimations is included in a table.

Task	Developer	Effort	
		estimated	actual
#42 Client: Specify protein for wires by drop-down menu	Thomas	3	5
#44 Client: Specify input signals	Jan-Pieter	16	20
#22 Client: Circuit bookkeeping	Felix+Niels	} 2*15	..+15
#45 Client: Save Circuit	Felix+Niels		Actual
#46 Client: Load Circuit	Felix+Niels		..+4
#47 Server: Simulate Circuit	Albert	2	Actual
#48 Server: Convert circuit to simulator input	Albert	14	Actual
#49 Wiki: Simulator	Albert	1	Actual
- Code Review	All	5*4	..+3
#50 Final Scrumplan-3	Thomas	2	Actual
#51 Scaffolding Scrumplan-4	Thomas	1	Actual
#52 Final report: Key Problems/Solutions	Thomas	4	Actual
<b>Total</b>		93	
<b>Optional tasks<sup>1</sup></b>			
#43 Polishing modelling/grid styles and workflow	Felix+Niels	-	..+1
#53 Client: Output visualisation	-	-	Actual
#54 Client: Simulate Circuit	-	2	Actual
#55 Final report: Reflection on teamwork	-	-	Actual
<b>Total</b>		>2	-
<b>Added during iteration</b>			
- JSLint ant target and style review. <sup>2</sup>	Jan Pieter	-	2
- Client: validate Circuit <sup>3</sup>	Jan Pieter	-	2
<b>Total</b>		-	4
<b>Grand Total</b>			-

### 3 Reflection on this iteration

In this section we will give a quick review on this iteration.

<sup>1</sup>Things from next iterations that could be done if sufficient time is available

<sup>2</sup>To ensure some best practices in our JavaScript code, including coding style, we use JSLint/JSHint

<sup>3</sup>For some reason, this task was not in the initial scrum plan #3, but it was an optional task in #2.
